# Parameters

with Feature / Application / Parameters / Dimension

RGB

## Features

- ※ SMD LEDs: SMD5050tri-chip
- ※ LED Qty: 60LEDs/m
- ※ Voltage: DC24V
- ※ 27mm(H)\*15.5mm(W) Dome  
20mm(H)\*11.5mm(W) Flat
- ※ IK Class: IK08
- ※ Waterproof Grade: IP68
- ※ The minmum bending diameter is 8cm
- ※ Min. Cutting Unit: 10LEDs
- ※ Min. Cutting Length: 16.67cm
- ※ Connection Length: 10M power at one end.  
20M power at both ends
- ※ Material: PVC-Ivory White
- ※ RGB SMD Flexible Neon Strip lights can work with RGB Controllerto achieve more effects.

## Application

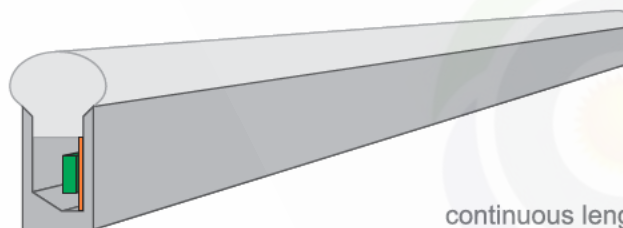

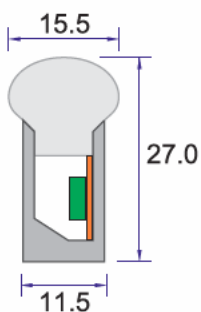

The products are widely used in the illumination and decorative lighting for piazza, restaurants, private villas,garden, conference room, exhibition hall, beautify the area environment, stage bar, shopping mall, parking sculpture, the tourist attractions.

## 2\*7\*15.5mm Neon Strip Parameters

Model No.	LED Type	LED Q'ty /meter (pcs)	Input voltage (V)	Power / meter (W)	Color	Length / cuttable Unit (Nm/K)	Beam Angle (degree)	SMD LEDs /Unit (pcs)	IP Rating	Cutting Length (cm)	Weight (Kg/m)
NFS2-RGB-D-24V	5050 SMD	60	24Vdc	12	RGB	620~630	270°	10pcs 5050SMD	IP68	16.67	0.53
						510~525					
						455~470					

### Dimensions of NFS2-RGB-D-24V

continuous length: 20M. power on both ends

## 20\*11.5mm Neon Strip Parameters

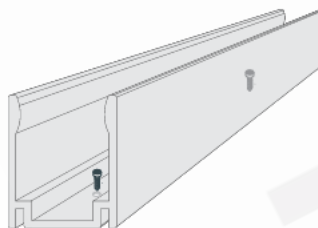

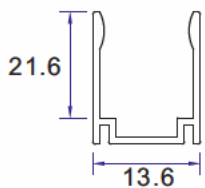

Model No.	LED Type	LED Q'ty /meter (pcs)	Input voltage (V)	Power / meter (W)	Color	Length / cuttable Unit (Nm/K)	Beam Angle (degree)	SMD LEDs /Unit (pcs)	IP Rating	Cutting Length (cm)	Weight (Kg/m)
NFS2-RGB-F-24V	5050 SMD	60	24Vdc	12	RGB	620~630	120°	10pcs 5050SMD	IP68	16.67	0.38
						510~525					
						455~470					

Dimensions of NFS2-RGB-F-24V

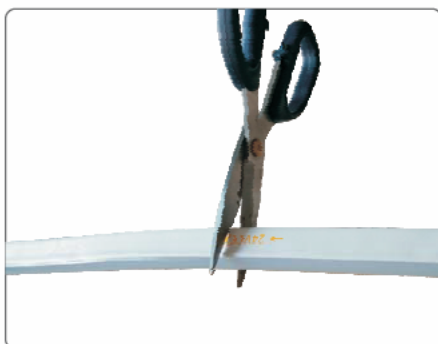

continuous length: 20M. power on both ends<sup>A</sup>

## A Aluminium Channel Drawing

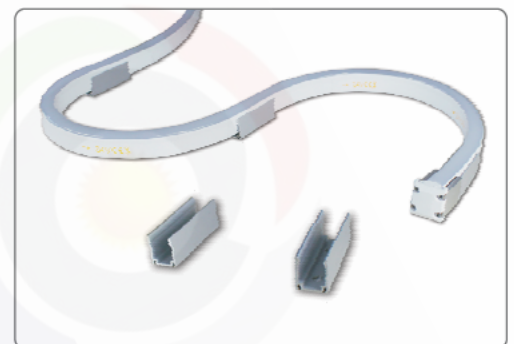

Every meter of aluminum channel has 2 screw holes. The installation usually requires installing aluminum channel as the first step, and then insert the LED neon product to the channel.

Cutting Mark

Linear Installation

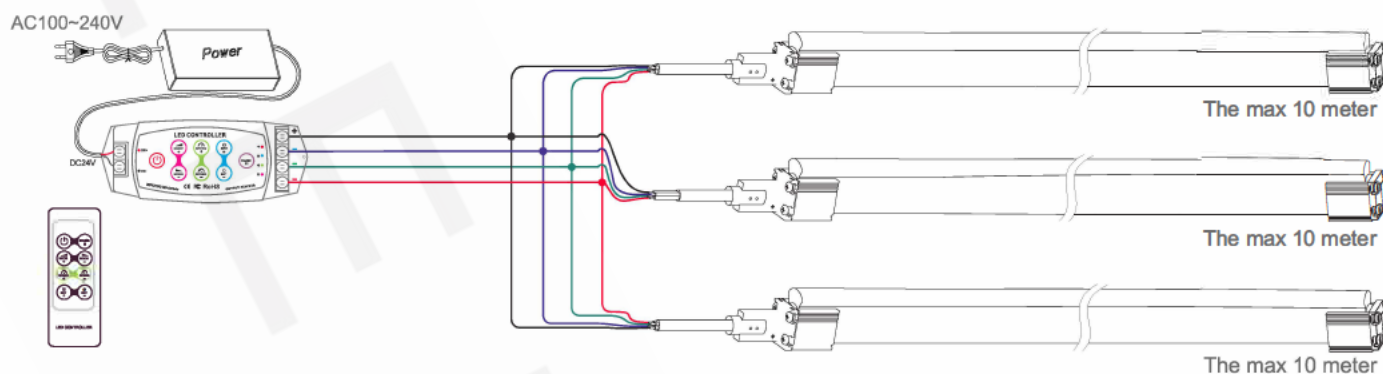

Curve Installation

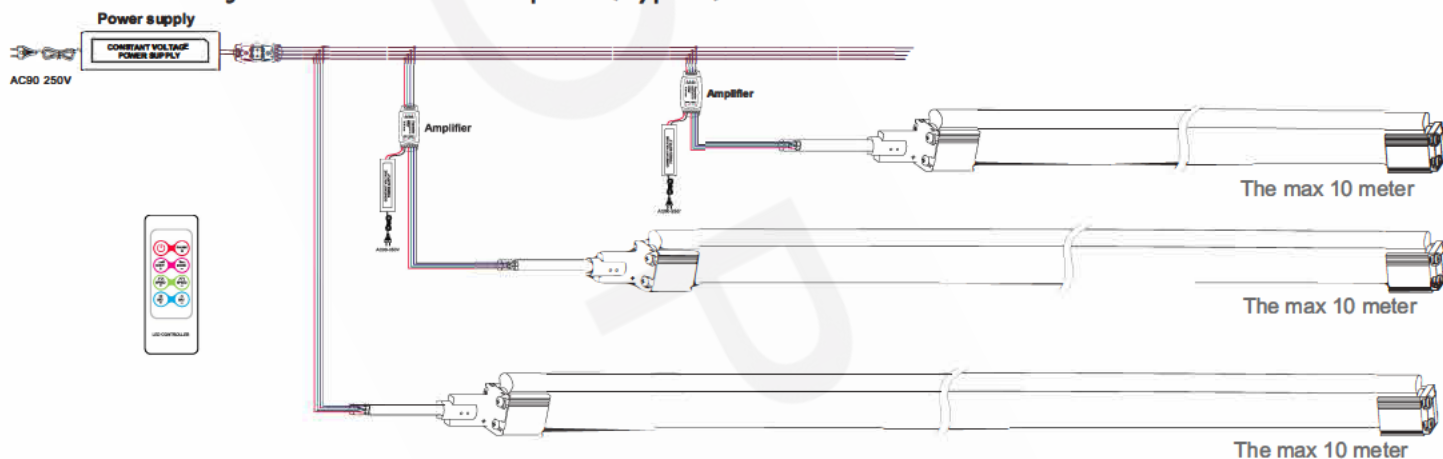

# Parameters with Connect Drawing

RGB

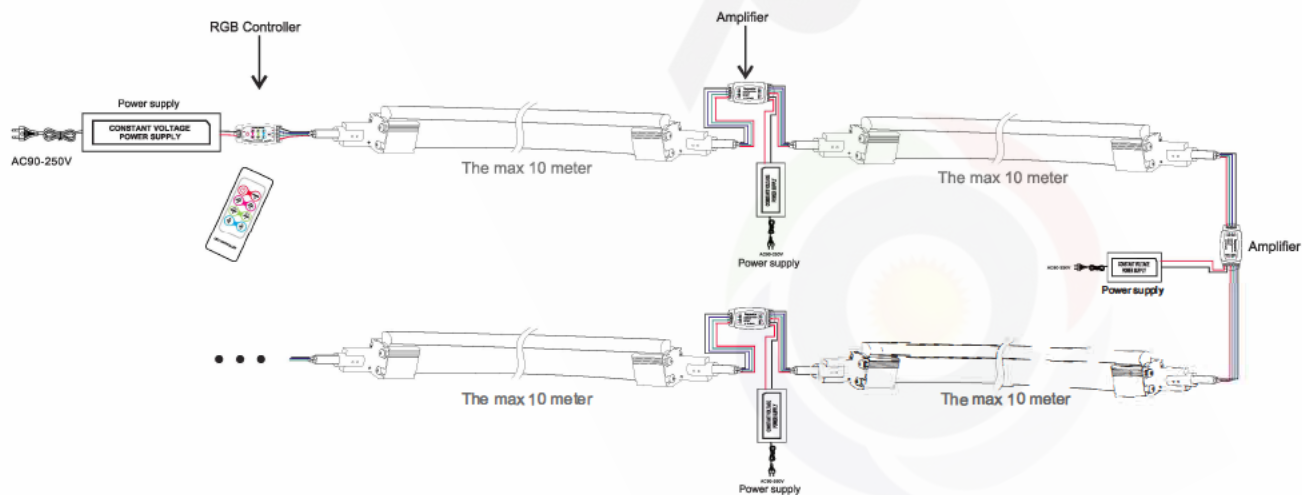

## Connect Drawing for dimmable

## Connect Drawing for RGB Controller + Amplifier (Type-A)

## Connect Drawing for RGB Controller + Amplifier (Type-B)

# Parameters

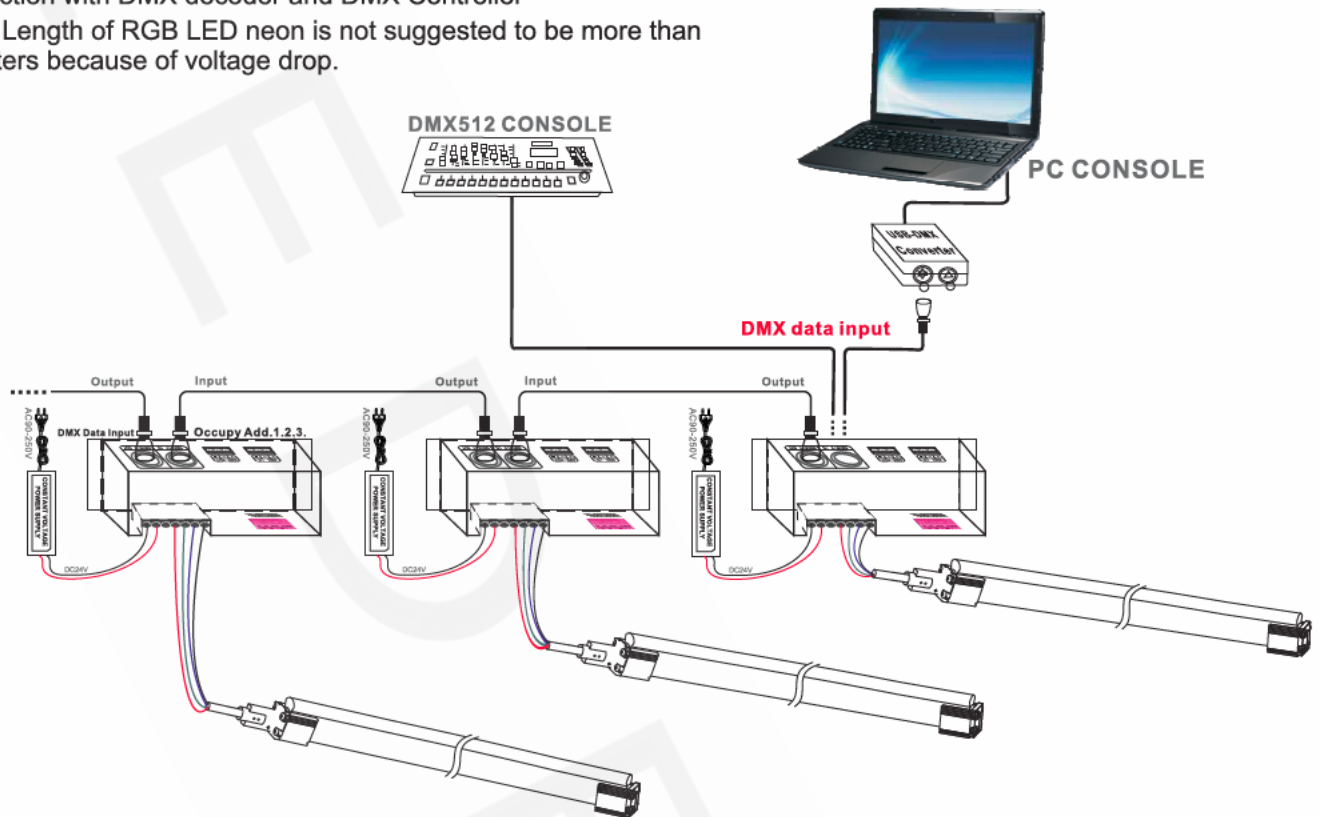

with Connect / DMX Connection / Bending Direction

RGB

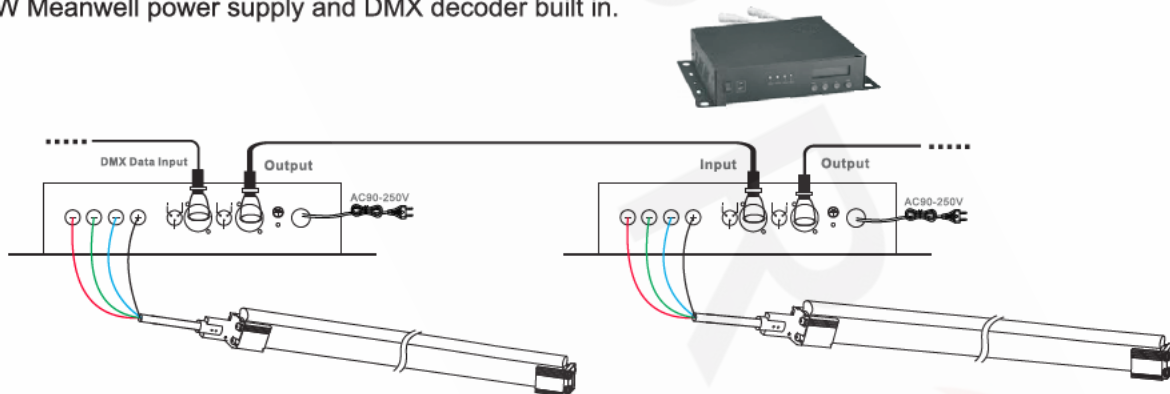

## Connection with DMX

Connection with DMX decoder and DMX Controller

Single Length of RGB LED neon is not suggested to be more than 10 meters because of voltage drop.

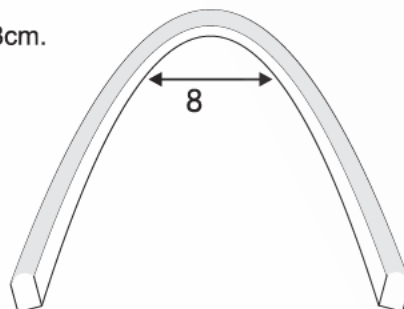

Connection with CTR-RGB-24V, this controller has 350W Meanwell power supply and DMX decoder built in.

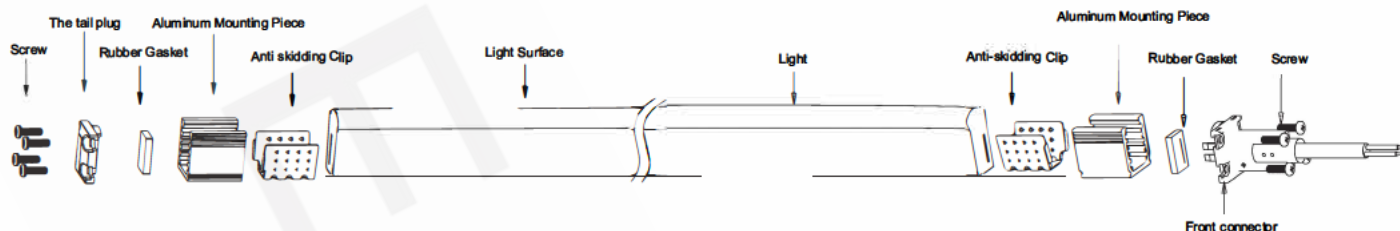

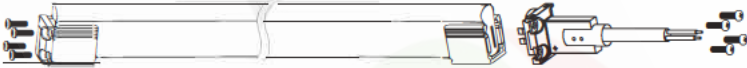

## Bending Direction

The minimum bending diameter is 8cm.

## Accessories (Assembling of DIY accessory)

Step-3	
Step-4	
Step-5	
Step-6	

### NOTE:

Please read these instructions carefully before installation  
leave a copy for the end user / maintenance engineer for future reference

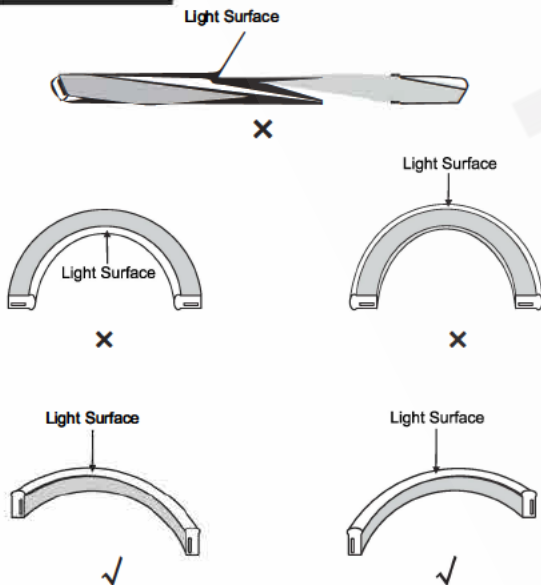

## Precautions

### Detailed Installation Instruction

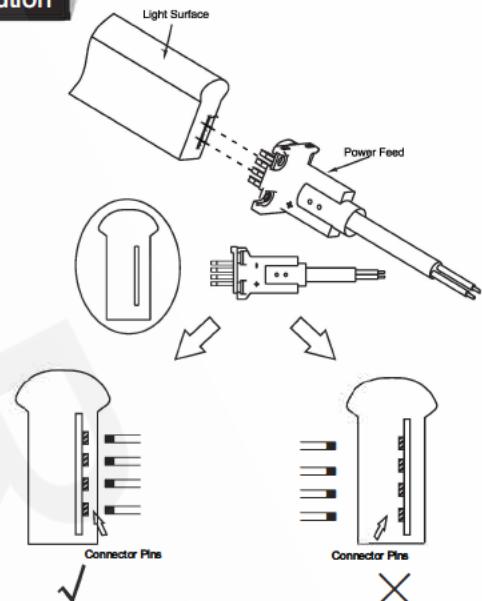

- Do not over extend the min. & max. bend radius.
  - Although products do not generate a great amount of heat, it is recommended that you do not cover or conceal it.
  - Do not puncture, cut, shorten or splice LED neon outside of the designated cutting marks.
  - Do not route LED flex neon through walls, doors, windows, or building structures.
  - Do not roll out LED flex neon on rough surfaces and over sharp corners. This will scratch the PVC optic.
  - Do not use the product if outer PVC jacket is damaged, loose connections, or if the wire is visible without insulation.
  - Do not secure the product with staples, nails, or like means that might damage the insulation or PVC material.
  - Do not installed LED flex neon on/in places where it is subject to continuous flexing.
  - Do not operate/run LED flex neon in temperatures exceeding 45C or 115F.
  - Do not operate LED flex neon over the specified voltage or LED life degradation will be greatly increased.
  - Do not leave any part of the LED flex neon unsecured. Movement over time from weather can cause damage from continuous movement.
  - All led neon ip68 rated connectors must be assembled properly to obtain rating.
  - Do not reverse polarity when connecting from both ends. This will damage the internal PCB board. Always test connections with your multi-meter.
  - Do not energize LED flex neon in the reel package.
  - LED flex neon can be cut only where marked. Look for "Dotted Line" or "Scissor Mark".
- Cutting outside of the specified mark will damage the light.

## Accessory Assembling
